LOCAL DELIVERY

Our free delivery service covers Philadelphia and vicinity, but we do not guarantee to maintain a daily delivery to these places.

SPECIAL ATTENTION

To our customers in New Jersey:

Due to the curtailment of Motor Transportation, we are unable to make free deliveries to Camden, N. J., and vicinity, of orders under \$1.50.

Shipment of goods can also be made by package service from Market and Chestnut Street Ferries, Broad Street Station, Reading Terminal, and B. & O. R. R., at 24th and Chestnut Streets. The tariff for shipments that can be made by this method on merchandise they will receive packed in one piece is as follows:

10 lbs. and under, 12c. 26 lbs. to 40 lbs., 24c. 11 lbs. to 25 lbs., 18c. 41 lbs. to 50 lbs., 30c.

Shipments weighing more cannot be sent via Package Service.

ORDER EARLY

We would greatly appreciate if you would send orders for seeds, plants, bulbs, etc., during January and February whenever possible. Shipments will be made when you want the goods.

GIFT CERTIFICATES

"Michell's Gift Certificates" available in any amount and redeemable at any time for our merchandise are most unusual gifts for your garden loving friends. They are ideal for Christmas, birthday and other remembrances.

WE WELCOME CHARGE ACCOUNTS

We invite you to take advantage of the convenience of a charge account with us. So that no time will be lost in executing your first order, please send us the names of two or more business houses with whom you have had post or present credit relations.

HAVE YOU MOVED?

Please let us know of any permanent change of address so that you may receive our catalogs regularly.

EMPLOYMENT SERVICE

We maintain a register of the names of competent gardeners, superintendents, etc., to employ help. We also maintain a register of competent landscape architects and jobbing gardeners. We recommend only those who have proved reliable.

SHIPPING INSTRUCTIONS

Always state by what method you want goods forwarded; otherwise we will ship according to our best judgement.

PACKING CHARGES

No charge is made for boxes, packing, or bags, except for two-bushel seamless sacks, which are returnable for credit at the market price as charged.

C. O. D. SHIPMENTS

Goods can be sent C. O. D. with the exception of perishable items: plants and cold storage bulbs. If shipment is requested by express or freight, send a partial remittance with the order. No. C. O. D. orders accepted for less than \$1.00.

CONDITIONS OF SALE

All contracts, sales, and acknowledgments of orders are contingent on crop failures, our ability to import and make deliveries in conformity with the "Plant Quarantine Act," partial deliveries by growers or manufacturers, strikes, or other unavoidable causes beyond our control, clerical errors included; also unsatisfactory credit standing, all quotations are subject to market changes and goods being unsold on receipt of order

Henry F. Michell Co. give no warranty, expressed or implied, as to the description, purity or productiveness of any seeds, plants or bulbs they send out, and they cannot be in any way responsible for the crop. If the customer does not accept the goods on these terms, he must notify us at once, and we will give instructions for disposition of the noods

FORWARDING SERVICE

We pay postage charges on all orders for Vegetable Seeds, Flower Seeds, and Grass Seeds in quantities up to 5 pounds (unless otherwise noted) to the First and Second Zones. If larger quantities of the above, also Bulbs, Plants, and Sundries, are wanted by Parcel Post, remit for postage the amount named in connection with the item to the First and Second Zones; for other Zones add additional postage or at the rate quoted in table below.

All Plants, Roots, and Bulbs are forwarded by Express (or Parcel Post when possible), purchaser paying charges, unless otherwise noted.

For those of our customers who prefer to receive such goods by Parcel Post, we will be pleased to forward in this manner such plants as can be sent in this way at the following additional cost, which must be added to the value of each order for Plants, Roots, or Bulbs unless otherwise noted.

To all points east of the Mississippi River, add 10 per cent to cover postage and packing charges; to all points west of the Mississippi River, add 15 per cent.

SAFE ARRIVAL. We guarantee the safe arrival of all goods sent to points within the United States except when shipped to points where there is no Express or Freight agent; to such points the purchaser must assume any claim for loss or damage.

A New and Accurate Way to Plan Your Vegetable Garden Don't Let the Shortage of Farm Labor Defeat Our War Effort-PLAN NOW to Plant Later!

INSTRUCTIONS: All garden crops can be divided into three groups-

INSTRUCTIONS: All garden crops can be divided into three groups—

(1) Long season crops which occupy space for the entire growing season. These we will call "L" crops.

(2) Early short season crops, which can be planted early and which will mature early. These we will call "E. S." crops. Crops in this group can be followed by second and sometimes third crops.

(3) Follow-up crops—are crops which can be planted in the same rows occupied by the "E. S." crops, after the "E. S." crops have been harvested. This group we will call "F" crops.

If your garden does not contain representatives from each of these three groups, you are not getting the most out of your space or efforts. Assuming that the diagram below is your garden—First fill in the varieties of vegetables, etc., that your family likes; that is, in the spaces marked "L" crops—select one or more crops listed under "L" crops. Make sure that the planting distances are matched; that is, if the space you are filling in is a two-foot row, the crop you select must also be one requiring two feet of growing space, etc.

After you have decided the kinds and varieties that you want, fill in the quantities that are required to satisfy the needs of your family or to fill up the space that you have the spaces filled in, copy off the kinds and quantities of seeds, roots, plants or sets that you require and mail this list to us.

Heading Varieties

For the first autdoor crop, seed is usually sown in hotbeds in February or March and transplanted to the garden in April in rows 1½ feet apart, 8 to 12 inches apart in the row. For a succession, sow in drills in the open ground at intervals of two or three weeks and thin out to 8 inches apart. For plants to force in hotbeds from November until spring, sow seeds in hotbeds in the fall. Where it is difficult to have the heading varieties develop properly on account of soil condition, we recommend using loose-leaf varieties.

All Heart. 71 days. An excellent Lettuce for either spring or summer use. The head, while large, has a loose heart of a decided buttery flavor. Can be used for sowing in frames. Pkt., 10ç oz., 30c; ½ lb., \$1.00.

Big Boston. 75 days. A large, flat, cabbageheaded variety, excellent for midsummer or fall use, or under glass in early spring and autumn. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Boston Market. 73 days. (White-seeded Tennisball). Early, small heading variety. One of the best for forcing. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Cosberg. 76 days. A home-garden variety with ability to head in summer weather and resist tip-burn. Heads small and compact; outer leaves light yellowish green, crumpled and frilled. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

lceberg. 84 days. A fine variety, producing large, solid, cabbage-like heads, firm, crisp, and of fine flavor. Leaves curly, slightly tinged red. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Imperial No. 44. 82 days. This variety has very long, well foiled leaves and produces hard, well formed heads appreciably less susceptible to tip-burn than other varieties. Pkt., 10c; oz., 35c; /4 lb., \$1.15.

Imperial No. 847. 84 days. Originally developed as a brown-blight-resistant variety for summer planting in California, has in recent seasons given most satisfactory results in other sections. Heads are medium large, hard, fine and well covered by the inner leaves. Pkt., 10c; oz., 35c; 1/4 lb., \$1.15.

Improved Hanson. 80 days. Tremendous, solid heads with outer leaves curled and interior almost white and very tender. Resists the heat well. Pkt., 10c; 0z., 30c; 1/4 lb., \$1.00.

May King. 63 days. The first solid head Lettuce to mature outdoors. It is of good size, with tender, full heart. Suitable for sowing under sash in early spring. Pkt., 10c; oz., 30c; 1/4, lb., \$1.00.

Michell's No. 1. 70 days. A good variety for summer use as it resists the hot sun better than most sorts. Heads unusually large, tender, and of a delicious buttery flavor. We do not recommend it for forcing. Pkt., 15c; oz., 35c; ¼ lb., \$1.15.

New York or Wonderful No. 12. 80 days. This is a leader of the cabbage-headed sorts. Heads large, dark green, with white interior and curled outer leaves. Pkt., 10c; oz., 35c; 1/4 lb., \$1.15.

White Big Boston. 72 days. A new heading variety which resembles Big Boston in size, solidity and general appearance, but it lacks the brown edge so common in that variety. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Loose-Leaf or Cutting Varieties

For early or midsummer use, seed should be sown very thickly. When pulling the young plants, try to do so carefully, with an effort to thin out the bed, thus allowing the remaining plants to become large.

Black-Seeded Simpson. 46 days. Ideal for midsummer use. When matured, presents a formidable loose head with finely fringed leaves. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00. Early Curled Silesian. 45 days. This variety should be cut instead of pulled, as it makes new growth from the same root. Leaves light green. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Early Curled Simpson. 45 days. An excellent, curly-leaved sort; loose heads and very tender. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Grand Rapids. 43 days. The leading variety in this class for forcing under glass, but may also be grown successfully outdoors. Leaves are very curly, crisp and brittle. Pkt., 10c; oz., 30c; ¼ lb., \$1.00.

Lettuce Plants

We can supply these in heading varieties only, of our selection. 25 plants, 35c; 100, \$1.25; 1000, \$10.00.

Chicken Lettuce

An excellent green for poultry or rabbits. Grows 18 to 20 inches high. Ready for cutting 40 to 45 days after sowing. Sow seed in rows or broadcast early in spring. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

Romaine or Cos Lettuce

This type, of French origin, differs greatly from the American varieties by its peculiar, upright growth. To produce tender heads, the outer leaves must be tied together at the top so that the inner ones blanch. It has a decided flavor. Best adapted to outdoor planting and stands the heat well.

Dark Green Cos. 66 days. Similar to the White Cos but darker green leaves. Inner leaves bleach a creamy to golden yellow with Endive-like flavor. Pkt., 10c; oz., 30c; 1/4, lb., \$1.00.

Paris White Cos. 66 days. White seed. Strong grower and very productive, with long, shell-shaped, medium green leaves of most excellent quality. As self-folder, but when plant is over half grown it is best to tie with the plant that the strong with string so that the inner leaves may be blanched perfectly white. Head 8 to 9 inches high, long loaf-shaped. Pkt., 10c; oz., 30c; ½ lb., \$1.00.

Michell's Select Spinach Seed

Epinard (Fr.) Spinat (Ger.)
Spinaccio (Ital.)

One ounce will sow about 75 feet of drill; 10 to 12 pounds, an acre

Sow for spring use, in drills 1 foot apart (covering the seed to about ½ inch), as early as the ground can be worked, and continue to sow every two weeks till May 15. Spinach seed seldom germinates during June, July, or August, so we do not recommend sowing again until September, which is the season to provide an early winter and spring crop. On the approach of cold weather, cover with manure, long straw, or other litter. Spinach can also be grown successfully under hotbed sash.

Rutabaga

Rutabagas should be sown in drills about 2/7 feet apart, and when 3 inches high thinned out to get the greatest root-development. They need to be cultivated liberally and hilled up when about 6 inches high.

up when about 6 inches high.
Customers frequently complain that Rutabagas grow too long, rather than in a round
form. In the locality of Philadelphia and
New York, the seed should be sown from
July 15 to August 1. Seed sown earlier than
this invariably produces long roots with long

stems.

American Purple-Top Yellow. 90 days. (Special Strain.) At least 8 to 10 days earlier than our usual strain. Roots are mostly round, with a small tap-root, yellow, with purple crown; flesh amber-colored, sweet and free from fiber; tops medium size and of a smoky green color. SPECIAL NOTICE

We regret that it is not practicable to ship Pot-grown Plants of Pepper, Parsie
Egaplants and Tomatoes via Parcel Post.

The foliage of these plants is very soft and tender and we have found, from experience (largely because of delays in the mail service), that they reach their destination in a worthless condition.

Nor can we ship any of the above-mentioned plants outside the beetle zone.

SEEDS OF CULINARY and MEDICINAL HERBS

There is an increasing interest in Herbs today, and Herb-gardeners are becoming quite popular. The majority of them are very easy to grow and therefore should be grown more extensively than they are.

For winter use, they should be cut just as they come into flower, tied in bunches, and hung in a light, airy place indoors, where they can be available any time.

MICHELL'S Reliable Grass Mixture

SEDING at the proper time is half the secret of success in lawn making. But on **the seed you sow** will depend success or failure. Quality in grass seed is of particular importance. The initial cost of the **best** seed is small compared with the time and labor of weeding and probable replanting which results from cheap, inferior seed. And the satisfaction derived from a really good lawn is immeasurable. Michell's Lawn Seed has been a leader in high quality for over fifty years. Many of the better lawns in this country are the result of Michell's seed, plus proper care. The answer lies in our insistence on furnishing only that seed which meets our rigid specifications of highest purity and germination and maximum freedom from weeds.

Quantity to Sow for Lawns. We recommend sowing: 5 lbs. per 1000 square feet; 150 lbs. per acre on new ground without grass. In renovating established lawns, use half the above quantities.

Michell's Permanent Pasture Grass

All-America Winners FOR 1943

AGERATUM

Michell's Blue Boy. Novelty. Extra dwarf. This Michell's strain is the result of many years' careful selection. The growth is uniform and even, about 4 inches high, and the plants are almost completely smothered with flowers of the richest shades of blue. Excellent for the border or rock garden. Pkt., 25c; large pkt., 75c; ½, 0.x., \$1.50.

ALYSSUM, VIOLET QUEENNew, dwarf, compact form with flowers of a pretty bright violet tint. A decidedly brilliant shade, and a variety that will come very true from seed. Pkt., 15c; large pkt., 60c; $\frac{1}{4}$ oz., $\frac{1}{5}$ 1.00.

ANTIRRHINUMS

Rustproof Varieties
This strain has proved excellent under intensively wet outdoor conditions.
They have stood the tests, and are better than 75 per cent rustproof. For growing outdoors for cutting or bedding, they will prove excellent.

Reveille, Majus Grandiflorum, R.-R. New. This gorgeous new Snapdragon grows to a height of 22 inches and has an upright base-branching habit, each plant producing from 6 to 8 huge spikes of flowers. The color is a deep luminous yellow with the upper lip of each floret toning to a lighter lemonyellow. The individual florets are unusually large and the plant is rustresistant. Pkt., 25c; large pkt., \$1.00.

MICHELL'S EXCLUSIVE INTRODUCTIONS

Dandy, Nanum Grandiflorum (Semi-Dwarf). A new variety, Color is a beautiful glowing orange with white tube. The habit of the plant is very dwarf and compact; free flowering. Pkt., 25c; large pkt., \$1.00.

Quaker Maid. One of the finest large-flowering varieties we have ever seen. The color is a brilliant rose, with large open florets which have yellow upper lips, and the tubes are pure white. The individual flowers are well set on good, strong, wiry spikes. The plants are base-branching and produce from 6 to 8 huge long-flowering spikes. Pkt., 25c; large pkt., 75c.

For other varieties of Snapdragons see page 24.

ASTER, VICTORY GIANTS MIXED

Honorable Mention, 1943 All-America Selections. A splendid extra early Giants of California or Comet type. Strong, sturdy plants, branching habit, growing 3 feet tall. The flowers average finches across, and in a fine range of colors, including salmonpink. Really a well balanced mixture without reds. A splendid type for bedding and cut flowers. Small pkt., 25c; large pkt., 75c. See back cover for color illustration.

CARNATION, MARGUERITE, GIANT

FLOWERING, ALLDOUBLE, MIXED

This is an extra-selected strain in a range of 15 to 20 colors. The flowers are large, fully double, and very freely borne. The plants are of stocky upright growth, excellent for cutting. Pkt., 25c, large pkt., 75c.

CLEOME (SPIDERFLOWER), GIANT PINK QUEEN

Silver Medal, All-America Selections. Huge trusses of bright salmon-pink top the long stems of this distinctly novel plant. This Cleome is a hardy annual easily grown from seed planted directly in the border or garden. It blooms abundantly from midsummer to late fall. Height 3 to 4 feet. Pkt., 25c; large pkt., 75c.

Alyssum, Violet Queen

Michell's Rustproof Antirrhinums

COSMOS, YELLOW FLARE

Silver Medal, All-America Selections. Similar to the original Orange Flare, except in color, which is a very rich golden yellow. A striking plant for the garden, growing 3 to 4 feet tall. Pkt. 25c; large pkt., 75c; 1/4 oz., \$1.00.

COSMOS, SEMI-DOUBLE, ORANGE RUFFLES

New. A semi-double form of the ever-popular Orange Flare. The extra two or three rows of petals add immensely to the butterfly-like beauty of the richly colored orange bloom. Plants are from ten days to two weeks earlier blooming than Orange Flare. Pkt., 25c; large pkt., 60c; 1/4 oz., \$1.00.

IPOMOEA (MORNING GLORY), PEARLY GATES
Silver Medal, All-America Selections. The flowers of this new Silver Medal, All-America Selections. The flowers of this new variety are a lovely lustrous white with creamy shading deep down in the throat and average 4½ inches across. The fast-summer until frost. Pkt., 25c; large pkt., 60c; ½ az., \$1.00.

MARIGOLDS

Dwarf Chrysanthemum-Flowered, Golden Bedder. Bronze Medal, All-America Selections. Very early—perhaps the earliest of all. Plants form symmetrical mounds covered with golden orange flowers. A row of outer guard petals is surmounted by outle crest of Dixie Sunshine type. Pkt., 25c; large pkt., 60c. Dwarf French Harmony Type, Butterball. Bronze Medal, All-America Selections. Most attractive, very compact, scabious-flowered, canary-yellow. Grows 6 to 10 inches tall, uniform; very early flowering. Pkt., 25c; large pkt., 50c. Dwarf Double French, Melody. Bronze Medal, All-America Selections. The flowers are fully double, brilliant orange in color, and are of the Harmony type. The compact plants are about 21 inches high. A very early and free bloomer. Pkt., 25c; pkt., 50c.

large pkt., 50c.

Mission Giants, Yellowstone. Honorable Mention, All-America
Selections. Bright rich clear yellow counterpart to Goldsmith,
the popular var-ety introduced last season, with large 2½inch flowers on luxurious strong-growing plants. Height 3 to
5 feet. Pkt., 25c; large pkt., 75c.

NIEREMERGIA, PURPLE ROBE

Bronze Medal, All-America Selections. A very fine deep violetpurple form of the popular Nierembergia hippomanica. It maintains its deep color, does not fade, has a neat, compact, free
flowering habit and blooms from seed in 15 weeks. Plants grow 4 to 6 inches high. Pkt., 25c; large pkt., 75c.

PETUNIA, GIANTS OF CALIFORNIA, GLAMOUR

Honorable Mention, All-America Selections. A luscious shade of salmon-rose in the Giant Ruffled Petunia type, faintly veined brown in the creamy open shallow throat. Strong, robust, extremely free-blooming and an entirely new shade in this type of Petunia. Pkt., 25c; large pkt., 85c.

All-America Winners AND NOVELTIES FOR 1943

Petunia, Ialoo

PANSY, New Sunshine Art Shades

Summer Blooming Pansy. This new strain has been developed from a type that is free flowering and blooms exceedingly well during the hot summer months. A beautiful range of delightful bright pastel and art shades, containing many unusual tints and blotches. 25c; large pkt., 85c.

PETUNIA, IGLOO

Bronze Medal, 1943 All-America Selections. This new extra com-Bronze Medal, 1943 All-America Selections. Ihis new extra compared the property of medium size, pure white equation produces flowers of medium size, pure white with a slight yellow throat, and coming 100 per cent true. The plants are uniformly compact throughout the season, and continue to flower until frost. The plant is a perfect mound of white, 8 to 10 inches in height, reminding one of an Eskimo igloo. This variety is ideal for borders. Pkt., 25c; large pkt., \$1.00.

PETUNIA, ENGLISH VIOLET

Honorable Mention, 1943 All-America Selections. A new and provided in the modelule varieties. It is almost the same beautiful color as English Violets. Very important, it will hold this uniform color throughout the season. The plants grow normally 15 inches high, quite compact, and we believe the best made blue dwarf bedding Petunia yet introduced. Pkt., 25c; large pkt., 75c.

Outstanding Petunias Exclusive With Michell's

New Victory. An extra dwarf, super giant Petunia. Huge deep throated fluted flowers, averaging up to 7 inches across. The plant habit is very dwarf, compact, bushy and free flowering. Our exclusive mixture contains a color range of excellent light and dark shades. This is a fine variety for bedding or for exhibition. Pkt., 35c; large pkt., \$1.00.

New Dazzler. The brightest and most colorful Petunia yet introduced. The flowers are brilliant shades of orange and rosy scarlet. Plain and semi-artifled, gold and white throated. Large blooms on plants of dwarf, compact habit. Fine for bedding or window boxes. See back cover for color illustration. Pkt., 35c; large pkt., \$1.00.

New Improved Admiral. A very superior selected strain. Flowers are a rich violet-blue, slightly waved. The plants are compact and upright in habit. Pkt., 35c, large pkt., 75c.

Collection of 1 pkt. each of the above 3 superb Petunias for 90c.

Adorable, Dwarf, Single, Fringed Lace Veil Type. An exclusive Michell introduction. As the name implies this is really an adorable Petunia. The flowers are of medium size and beautifully fringed. Color is a pleasing shade of rose-pink with white, delicately veined throats. Pkt., 25c; large pkt., 85c.

Beauty, New Dwarf Single Giant Ruffled. An exclusive Michell introduction. Here we have a Petunia that is really a beauty. The flowers are quite large and well fluted, with veined throats, and the color is a bright clear salmon, a shade that will always please. The habit is dwarf, compact; very early and free flowering. Pkt., 25c; large pkt., 85c.

Mars, Single-Flowered Grandiflora Hybrids. New. This new variety is the deepest crimson and largest-flowered to date. The color is deeper than Flaming Velvet, and the flowers are huge, measuring 4 inches across. Pkt., 25c; Jarge pkt., Ober 10 pkg. Pkt., 25c; Jarge pkt., 25c; Ja

Radiance, Single Hybrida Type. Silver Medal. A very brilliant and rich rose or cerise color with brown-veined, yellowish throat. Flowers 1¾ to 2 inches across. Height 1 to 1½ feet. Pkt., 25c; large pkt., 50c.

PHLOX GIGANTEA, RED GLORY

Honorable Mention, All-America Selections. Here is the brightest color that we have ever seen in a Phlox. It is brilliant red with a contrasting white eye. Red Glory is identical in type, habit of growth and size of bloom to the Gigantea Art Shades. Pkt., 25c; large pkt., 75c.

Michell's Rose Beauty, Giant Column Double Excelsior. A fine new variety with exceedingly large double florets. The color is a clear La-France-rose-pink—a very popular shade. We believe this Stock to be the outstanding pink in this type. Pkt., Z5c; large pkt., \$1.00.

VERBENA HYBRIDA GRANDIFLORA

Annapolis Blue. Novelty. The first mid-blue Verbena that does not have a tendency to have a purple cast to the florets—a real deep Belladonna-blue. A strong husky grower with large trusses of 3-inch flowers. Pkt., 25c large pkt., 75c.

Roseglow. Novelty. A very unusual color—deep glowing rose shading to orange-scarlet, so luminous that each plant has the appearance of a small flat fountain of fire. This new Verbena is decidedly free flowering. When in full bloom each plant will average forty flowering clusters. Pkt., 25c; large pkt., 60c.

Dwarf Erect Compact Varieties Patriotic Red, White, and Blue Collection

The following three Verbenas, if started early, will make a fine red, white and blue color display in the garden.

Red Sentinel. Novelty. This is a true Dwarf Compact variety having flowers of an intense bright red with no eye. Each plant produces from 1.2 to 1.5 flowering clusters, 6 to 8 inches high. Pkt., 25c; large pkt., 75c.

White Ball. Novelty. A petite-growing Verbena only 7 inches high with a score or more of stiff, erect branches, each bearing 3 to 5 heads of 2-inch florets. The color is pure white. Pkt., 25c; large

Blue Sentinel, All-America, Rich violet-blue, Pkt., 15c; large pkt.,

COLLECTION PRICE: 1 pkt. each, 3 varieties, 50c.

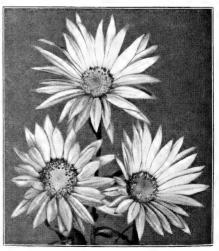

XANTHISMA TEXANUM, STAR OF TEXAS

One of the prettiest annuals and deserves to be very popular. Flowers are single, Daisy-like, with long, pointed petals. The color is a light canary-yellow. Stems are wiry and excellent for cutting. Will do well in dry open places. Pkt., 25c; large pkt., 60c.

ZINNIA, ROYAL PURPLE

Honorable Mention, All-America Selections. The deep rich reddish purple tones of this Zinnia are a charming reminder of the soft velvet of regal robes. The plants grow on the average 2½ to 3 feet tall and its extra large, double blooms are about 4 inches in diameter. Pkt., 25c; large pkt., 60c; ¼ acz., 90c.

Michell's "Distinctive" Flower Seeds

FOR NOVELTIES AND SPECIALTIES.

See Pages 21 and 22

During our fifty-three years of service to American garden lovers, we have always maintained a reputation for seed of superior quality. The success of our many customers in growing superior plants has strengthened our conviction that we shall supply only those varieties and strains of finest quality.

In the pages that follow, all of our flower seeds are arranged alphabetically. The annuals, biennials, and perennials are carefully marked so that those who are not familiar with the different kinds of plants will not be confused.

Annuals. These grow to maturity, bloom, ripen their seed, and die the same year. Asters, Poppies, Sweet Peas, Morning Glories, and Zinnias are typical examples. Some of these Annuals are sown in a sunny window indoors, or in a hotbed or cold frame from March to May in order to get an early start. Seed of practically all Annuals can be sown in the open ground after danger of frost has passed.

Biennials. These are raised from seed started in early summer, flowering the second year, after which they die. Typical examples are Pansies, English Daisies, and Canterbury Bells.

Perennials. These plants live on from year to year, increasing in size and in beauty with age. Typical examples are Aquilegia, Delphinium, and Hardy Phlox. Many Perennials may be grown from seed, which is usually planted outdoors from June to September. The young plants may be carried over the first winter in a cold frame or they may be set in their permanent places in early autumn and given a light protective mulch the first season. Some Perennials are known as half-hardy and require winter protection each season, and those known as Tender Perennials require greenhouse protection over winter.

A complete index of flower seeds will be found on page 95. Varieties marked * are especially suitable for rock gardens.

Michell's SUPERB ASTERS

Special Note: While this lovely fall flower is very easily grown from seed, the greatest possible care should be exercised with the seed bed. Old soil and boxes should never be used the second time without should be exterilizing, to avoid the numerous diseases to which Asters are so susceptible. Barnyard manure should never be employed as a fertilizer; we recommend the use of fine-ground bone meal. Asters should not be grown in the same location two years in succession.

Novelty Fusarium-Wilt Resistant Strains

We believe the following varieties are practically immune to this disease. We feel sure that by using this seed many disappointments due to crop failures will be eliminated.

How to Sow Petunia Seed

The seed of Double Petunias is very fine The seed of Double Petunias is very fine and should be sown inside in flots or pots, using a mixture of finely sifted soil, with the addition of some sand. Thoroughly water the soil and then lightly scatter the seed on the surface. Do not cover the seed with soil. The receptacle should be covered with a sheet of newspaper and a pane of glass, and kept in a warm location until the seedlings start to grow. It is important It is important not to discard the small seedlings, as these usually produce the best double flowers.

HAND-PICKED FIELD CORN

Plant 8 to 10 quarts per acre in hills for shelled Corn or for silo, or sow $1\frac{1}{2}$ to 2 bushels broadcast for fodder.

Our strains of Corn are not the common kinds usually found in abundance on the market. We give very careful attention to selected stock in all lines of farm seeds. This is particularly true of Field Corn where reselection means the limit of crop with little or no increase in cost. Our stock is selected for size of ear and fodder, unformity of kernel, and the careful finish of the tip and butt, all of which means a considerable increase in production. Field Corn weighs 56 pounds per bushel.

lowa 939

Maturity 100-105 days.

Approximately ten days earlier than Lancaster County Sure Crop. Adapted to a wide range of conditions. Ears are cylindrical shaped; kernels somewhat rough and soft. Popular with cattle feeders because of non-flinty kernel.

U. S. 13

Maturity 110-115 days.

Matures about nine days later than Lancas-ter County Sure Crop. Medium rough, deep grains; medium tall stalk. Good silage pro-ducer throughout the eastern states. One of the highest yielding of all hybrid varieties for both grain and silage.

Early Leaming Grain 90 days.

A medium early variety adaptable to most by section. Yellow wedge-shaped grains, meany section.

Eight-Rowed Yellow Flint Grain 90 days.

Grows a long ear with exactly eight rows of grain. Thin cob, grain very hard and of a deep golden color

Eureka Ensilage Silage 115 days.

While this variety will not mature ears in northern localities, it is of the best ensilage varieties. Grows very tall and leafy, giving heavy tonnage.

Our Eureka is of an extra heavy yielding strain and should not be confused with the ordinary type of this variety.

Improved Leaming

Silage 95 days-Grain 105 days.

Known for its adaptability to most any soil and climate. Medium-sized ear with grains of rich yellow, wedge shaped.

Lancaster County Sure Crop Silage 90 days-Grain 100 days.

The most popular variety for silage in Penn-Ivania, New York and the New England The most popular variety for single in remissivania, New York and the New England states. It is adaptable to practically all climatic and soil conditions and will withstand drought. A favorite because it provides plenty of silage with rich feed value. Grows tall, leafy stalks; long ear with thin cob—high in protein, husks easily, shells well, rich yellow.

Reist's Sweepstakes (Improved West Branch)

Silage 90 days-Grain 95 days. A mixed color corn, some grains are yellow with touches of red, while others are red with pale caps. Large ear with wide grains. More tons per acre for the silo.

White Cap Yellow Dent

Silage 105 days-Grain 115 days.

Developed here in Lancaster County. Large ear, red cob, cap of grain white, lower part light yellow. An excellent producer of rich silage in New York state. A good yielder of corn, which matures a bit earlier than most of corn, which mature the Dent varieties.

Reid's Yellow Dent

Silage 105 days-Grain 120 days.

Often called Golden Yellow Dent and classed as a medium seasoned corn. Large broad heavy ears-an extra good sheller.

Price for any of the above varieties of Field Corn, 20c per qt. (by Parcel Post, 30c.) peck \$1.25; bu. \$3.75.

LADINO WHITE CLOVER

Sow it for a year round pasture. U. S. Department of Agriculture says: "Ladino is the largest growing form of white clover. It is similar to White Dutch but grows about twice as large. Introduced from South Europe. Many farmers cut it for hay in the summer and graze it the rest of the year.

it the rest of the year.

It is a long lived perennial. Its tap root goes down one to three feet. The stems run on the ground, taking root. One plant covers two feet. A sparse stand soon thickens into a dense even growth. The only parts available to grazing are the highly nutritious leaves and flowers which rise 12 to 20 inches in great profusion from the numerous joints.

It grows on any soils, even shallow hardpans, but does best on loam or clay where moisture is plentiful. The seed is so small it requires a firm hard seedbed, planted shallow and covered every lightly. Our seed is scorrified, aerminates

over lightly. Our seed is scarified, germinates over 90 per cent, requiring one-half as much per acre. Inoculate and sow in spring or fall, 5 lbs. per acre alone, or 3 lbs. in mixtures. Don't posture until plants spread and start sending up shoots from the joints. Lb. \$1.50.

Michell's HARDY

A garden is not complete without a planting of Hardy Lilies. They do exceedingly well in the herbaceous border. The varieties listed can be planted in the early spring months, and it is recommended that they be planted among hardy perennials, as the shade from the surrounding plants is necessary for their welfare.

Cultural Directions. All Hardy Lilies should be planted from 6 to 10 inches deep. The bulbs should be completely enveloped in sand and no manure should come in contact with them, but may be placed 4 to 6 inches underneath. All loose-petaled bulbs should be planted on their sides instead of upright. Cover with leaves or litter during winter.

GORGEOUS GLADIOLUS

There is no other summer-flowering bulb that is enjoying so great popularity as the Sladiolus. Their adaptability to garden decoration or to use as cut flowers during the summer and early autumn is surpassed by no other flower. They are not only showy in the garden, but when cut with the first flower open will last for ten days in the house. While they thrive in almost any good garden soil, better results may be had if soil is well prepared and enriched with some of our pulverized manures. Great improvements have been made in the size, color; and beauty of these flowers. Our list comprises the best of recent introductions as well as the most popular of the standard varieties. Plant bulbs 4 inches deep and from 4 to 6 inches apart.

Second-size bulbs. Doz., 40c; 100, \$2.00; 1000, \$18.00.

Michell's Meritorious Dahlias

Time of Shipment. Unless specially requested, tubers will be shipped March 15th to June 1st; plants May 15th to June 15th.

Culture. Dahlias are at their best during the latter part of September or early in October. To get exhibition blooms, disbud plants up to August 1st. Spade or plow the soil 1 to 1½ feet deep; fertilize with well-rotted stable manure or Hyper-Humus; scatter about ½ pound of bone meal around each hill when planting. It soil is very heavy, incorporate a liberal quantity of granulated peat moss. Athaut August 1, apply about ½ pound bone meal to each plant and work in thoroughly; sheep manure or potato fertilizer can be substituted for bone meal at this time to good advantage.

How to Keep Dahlia Tubers After They Are Shipped to You If Too Early to Plant

Open package and allow tubers to remain in packing material. Do not expose to air or moisture too much; keep in a cool place, but not where they will freeze.

New Dwarf Dahlia, Gertrude

New Dwarf Dahlias for the Garden

This new race of Dahlias has created quite a sensation. They are wonderfully apt subjects for garden planting, forming dwart, compact plants which bloom throughout the summer until frost. The flowers are seldom over 4 inches in diameter and are produced in great profusion. We offer green plants of these, ready in May, from 3-inch pots.

Gerda. Very double, 5- to 6-inch, lilac-rose flowers are freely produced throughout the summer and fall on vigorous, healthy plants.

Gertrude. Compact plants bearing a great pro-fusion of clear sulphur-yellow very compact flowers of good size.

Kate. Showy bright scarlet flowers of formal contour. A charming variety.

Maria. (Improved Easter Greeting.) White flowers somewhat larger and of better form than Christine, but not as early.

MICHELL'S MERITORIOUS DAHLIAS

The Dahlia as a cut flower enhances the beauty of any decoration you may make. It is a prolific bloomer, a single bush producing blooms for many weeks. The best time to cut flowers is in the early morning. Mature flowers should be selected, the stems cut slant-wise with a sharp knife, the lower leaves stripped off, and the ends of the stems either burned or dipped in boiling water for half a minute. The Dahlias should then be placed in deep containers full of cold water and put in a cool place, free of drofts; if the ends of the stems have become dry, they should be cut before being placed in water.

Michell's Summer - Flowering Bulbs

Amaryllis

Cultural directions: There are few bulbs which will give the amateur gardener (or even the professional) more for his money or time than the Amaryllis.

than the Amaryllis.

Place the bulbs, when they are procurable (usually from fall until spring), in pots 4 to 6 inches or more in diameter, and cover only to the shoulder of the bulb, leaving the neck protruding. Use a rich sandy loam, mixed with some bone meal or sheep manure. Water sparingly at first but increase as the growth increases. A temperature of from 50 to 60 degrees is the most suitable. The flower spikes, often 3 to a bulb, will develop quickly, and each bears several of the immense, beautifully colored likylike flowers. colored, lily-like flowers.

After blooming, it takes the foliage a con-After blooming, it takes the follage a Considerable time to complete its growth, and the plants should be well cared for during that period, to insure next year's blooming. Michell's HARDY GARDEN ROSES

The Roses we are offering are all strong, 2-year, field-grown plants that were dug last fall and potted into 6-inch pots, then stored in cold frames without any artificial heat. During the latter part of March these potted plants are moved to beds in the open air where they receive no further protection. Under this treatment they develop in a natural way and are not only superior to stock which has been developed into full growth under glass, but also better for spring planting than plants which have been carried in cellars, in cold storage, or kept dormant in any other way until planting time in late April or May. Roses thrive best in an airy position where they can have light shade during part of the day, but not near enough to trees and shrubs whose

roots would rob them of food and moisture. Roses are gross feeders and consequently require a rich soil. Select a well drained position where the soil is good and dig in a liberal amount of well-decomposed manure, thoroughly mixing it with the soil. For best results, the beds should not be too wide; plant the Hybrid Teas 15 to 18 inches apart and the stronger growing Hybrid Perpetuals 2 feet apart, planting all about 8 to 10 inches from the edge of the beds. Budded Roses should be planted so that the bud is not over 2 inches below the surface of the ground; firm the soil well around the roots and give a thorough watering. Throughout the summer the surface of the bed should be cultivated.

HARDY CLIMBING AND RAMBLER ROSES

As ornamental plants for covering verandas, As ornamental plants for covering vertified porches, side walls, pillars, fences, etc., these are unequaled, calling forth more admiration than anything else that can be used. The large-flowered varieties require no pruning beyond the removal of very old and worn-out canes, and the thinning out of weak growth. Canes becoming too long may be shortened.

The Ramblers, or small-flowered cluster type, should have the old canes removed at the base as soon as they finish blooming, training the new canes into place for next year's bloom.

American Pillar. The large, single flowers are a lovely shade of cherry-pink, with a clear white eve surrounding numerous golden vellow stamens

Michell's Hardy Perennial Plants

Without exaggerating in any way it may be said that practically all of the Hardy Perennials are of easy culture.

In planting Perennials, let us remember that well-prepared soil will more than repay the effort involved. Don't try to crowd your Perennials. Allow them ample space in the beds or borders so that they can develop their natural form. The matter of grouping or arranging reflects the ideas of the individual garden maker. If possible, choose a location that has a background of flowering shrubs, evergreens, a hedge, or a wall. To be sure, Perennials cannot be expected to grow in dense shade, but there are some that flourish better in partial shade than they do in full sun. Others must have a sunny location in order to thrive. Tall-growing plants are most effective in the background; those in the middle ground would, of necessity, be of medium height with an occa-

sonal group taller than the rest for accent purposes. Then, those plants used at the edge of the bed or border would naturally be those of low, somewhat spreading growth.

All too often, garden enthusiasts make the mistake of buying one plant of a kind with the expectation of getting spectacular masses of color. However, the result is usually spotty in its effect. Plant Perennials in groups of three or more, making an irregular mass.

Seldom, if ever, can a Perennial border be planted perfectly the first time. There are always some plants that need to be shifted to more favorable locations. But this is all a part of the fun of gardening. Why not plant a new Perennial garden? There are many surprises in store for you.

Michell's Hardy Decorative Flowering Shrubs

A planting of shrubs, massed around the boundaries of a garden, forms a harmonious background against which the bright colored hardy perennial plants appear to their best advantage. There are many suitable locations for planting shrubs about the home grounds. The house foundation and the angles and corners should be softened by shrubs of medium height. Spiraeas, Hydrangeas, Berberis, Deut-

height. Spiraceas, Hydrangeas, Berberis, Deutzias, and others of a like nature will be found most suitable for this purpose.

Taller shrubs, such as Lilacs, Philadelphus, and Althaeas, are better planted along the sides and at the back of the grounds. Here they can be used to give a frame to the property, block out undesirable views, and serve as a screen for any purpose desired. Such group plantings should be made in the nature of borders, and the shrubs selected and arranged to give a continuance of bloom and pleasing foliage combinations, together with a fall and winter coloring of bark and berries.

MICHELL'S INSECT DESTROYERS, Etc.

To bear out our reputation as one of the most complete seed-stores in the world, we constantly carry adequate stocks of all of the various insecticides, fungicides, pest controls, etc., listed on this and the next three pages. It is natural, with so many brands on the market, that the same results can be accomplished with several different brands in any one class. Many, of course, have their distinct values, which we have tried to bring out in the brief descriptions.

brief descriptions.

In selecting a remedy for garden pests and diseases, it is well to bear the following in

Contact Insecticides kill chiefly contact Insecticides KIII chierily through a ctual contact and furnes, and for best results must be sprayed directly on the insect. These are used to combat sucking insects which feed on the inside of the foliage.

Stomach Poisons are used to control chewing or leaf-eating insects, and, to be effective, must adhere to the leaf-surface on which the insects feed

Fungicides are used to combat plant diseases of a fungous nature.

For a Beautiful Garden —

Pacific Hybrid Delphiniums

PLANT THESE COLORFUL PERENNIALS

Mrs. P. S. Dupont III Avalanche Eugene Wander

Burgundy

Chrysanthemums

For fall flowering the Chrysanthemum cannot be surpassed. They are garden favorites. **Above collection**,

For complete list see page 61.

Delphinium

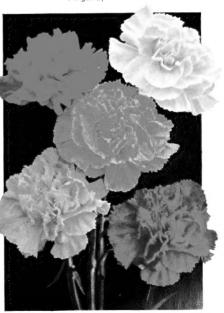

Varieties of Michell's Del-phiniums are numerous— make a superb background for any perennial garden. 80c each; 3 for \$2.25; \$8.00 per doz.

Phlox

One of the perennial lov-er's favorites—we have a complete list. See page 65.

Carnations

Easy to grow and excellent for cutting. Hardy Carnation list page 60.
